

# Electronics for P-O-P

**Duco Technologies.** Wide-angle LEDs have a broader viewing angle than traditional LEDs. The super-bright flashing lights have a 60-degree viewing angle. The battery-operated or AC-powered units include sizes such as surface mount, 1.8mm, 3mm, 5mm and 10mm. Colors are red, yellow, orange, green, blue or white. Lighting effects are random, fade, marquee, sequential and chasing. **Circle 35**

**Clegg Industries.** Demoscan display units feature audio with built-in video. Content can be customized for up to 74 minutes of programming. Some units measure 16½ inches by 11¾ inches by 2½ inches. **Circle 36**

**Way-Light.** Light-Sticks and Way-Light systems are deco-style fluorescent lamps available in six sizes and nine colors. No external ballasts or power supplies are needed, so the lamps can be used on floors, ceilings, walls and windows. **Circle 37**
